

## Getting Started for Dummies

### Styling the Product Slider

All color changes can be made in the product-slider.css file

- **Background** [ .ps\_bgcolor ]

```
1  .ps_bgcolor {
2      width: 100%;
3      height: 450px;
4      background-color: #edf0f3;
5  }
6
```

- **Headline** [ .ps\_headline ]

```
72  .ps_headline {
73      margin-top: 0px;
74      margin-bottom: 0px;
75      padding: 15px 20px;
76      border-radius: 3px;
77      background-color: rgba(0, 0, 0, .25);
78      font-family: 'Open Sans', sans-serif;
79      color: #fff;
80      font-size: 28px;
81      line-height: 38px;
82      font-weight: 300;
83  }
84
```

- **Button** [ .ps\_button ]

```
61  .ps_button {
62      margin-top: 25px;
63      padding: 15px 20px;
64      border-radius: 3px;
65      background-color: #fff;
66      box-shadow: 0 1px 3px 0 rgba(52, 64, 75, .55);
67      font-family: 'Open Sans', sans-serif;
68      color: #34404b;
69      font-size: 16px;
70  }
```

- Active Tab [ .ps\_tab.w--current ]

```
104 .ps_tab.w--current {
105     z-index: 5;
106     display: block;
107     width: 320px;
108     border: 1px solid #dedfe4;
109     border-top-left-radius: 3px;
110     border-bottom-left-radius: 3px;
111     background-color: #fff;
112     box-shadow: 0 0 2px 1px rgba(52, 64, 75, .2);
113 }
```

- Inactive Tab [ .ps\_tab ]

```
85 .ps_tab {
86     display: block;
87     width: 300px;
88     height: 20%;
89     padding: 12px 0px 12px 12px;
90     float: right;
91     background-color: #fff;
92     box-shadow: 0 0 2px 0 rgba(52, 64, 75, .4);
93     -webkit-transition: z-index 250ms ease, width 250ms ease, box-shadow 250ms ease;
94     transition: z-index 250ms ease, width 250ms ease, box-shadow 250ms ease;
95 }
96
```

- Tab Text [ .ps\_tabtext ]

```
115 .ps_tabtext {
116     position: absolute;
117     top: 50%;
118     display: inline-block;
119     width: 200px;
120     margin-left: 15px;
121     -webkit-transform: translate(0px, -50%);
122     -ms-transform: translate(0px, -50%);
123     transform: translate(0px, -50%);
124     font-family: 'Open Sans', sans-serif;
125     color: #50535d;
126     font-weight: 400;
127 }
128
```

## Getting Product Slider on your website

### Step 1 - The Start

Open the index.html file in your code editor and your browser to see what the slider looks like.

### Step 2 - Body Code

Copy all code from here...

```
25 <!-- Copy from the line below... -->
26 <div class="ps_bgcolor">
27   <div class="w-clearfix w-hidden-medium w-hidden-small w-hidden-tiny ps_desktopcontainer">
28     <div class="ps_covercontainer">
```

to here...

```
125   <div class="w-slider-nav w-round ps_slidepagination"></div>
126 </div>
127 </div>
128 <script type="text/javascript" src="https://ajax.googleapis.com/ajax/libs/jquery/2.2.0/jquery.min.js"></script>
129 <script type="text/javascript" src="js/slider.js"></script>
130 <!-- ...to the line above, and paste it into the body position of the page you want the slider. -->
```

and paste it into the body position of the page you want the slider to appear in.

### Step 3 - Head Code

Copy all this code and paste it into the head of the HTML page you want the slider to appear in.

```
11 <!-- Copy from the line below... -->
12 <link rel="stylesheet" type="text/css" href="css/normalize.css">
13 <link rel="stylesheet" type="text/css" href="css/slider.css">
14 <link rel="stylesheet" type="text/css" href="css/product-slider.css">
15 <script src="https://ajax.googleapis.com/ajax/libs/webfont/1.4.7/webfont.js"></script>
16 <script>WebFont.load({google: {families: ['Open Sans:300,300italic,400,400italic,600,600italic,700,700italic,800,800italic']}});</script>
17 <script type="text/javascript" src="js/modernizr.js"></script>
18 <!-- ...to the line above, and paste it into the head of the HTML page you want the slider -->
```

### Step 4 - Change Headline Text

Change the Headline text here:

```
32 <div class="ps_headlinecontainer">
33   <h1 class="ps_headline">This is a Product Slider. Get more clicks and sales by featuring your stuff with it. Like cookies. Nom nom! 😊
34   </h1><a href="#" class="w-button ps_button">Download Product Slider</a>
35 </div>
```

### Step 5 - Change Tab Text

Change the Tab text here:

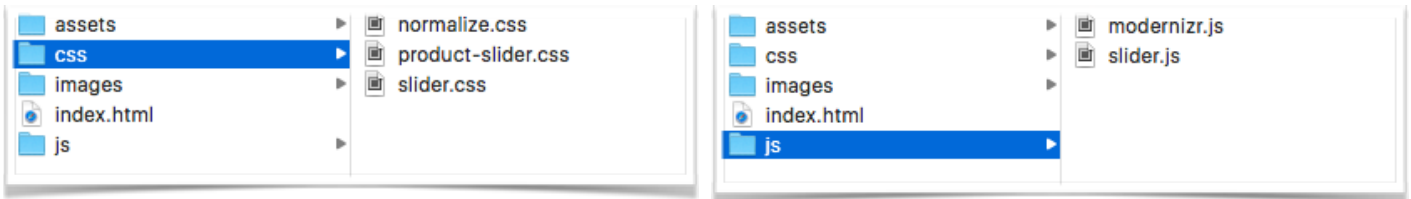

```
68 <div class="w-tab-menu w-clearfix ps_tabspanel">
69   <a data-w-tab="Tab 1" data-ix="tab1" class="w-tab-link w--current w-inline-block ps_tab">
70   <div class="ps_tabtext">Your product's label go here</div>
```

and here:

```
92 <div class="ps_mobiletab">
93   <div class="ps_mobiletabtext">Feature your stuff here. Like Cookies. Nom nom!</div><a href="#" class="w-button ps_button mobile">Download Slider</a>
94 </div>
```

## Step 6 - Copy CSS & JS files

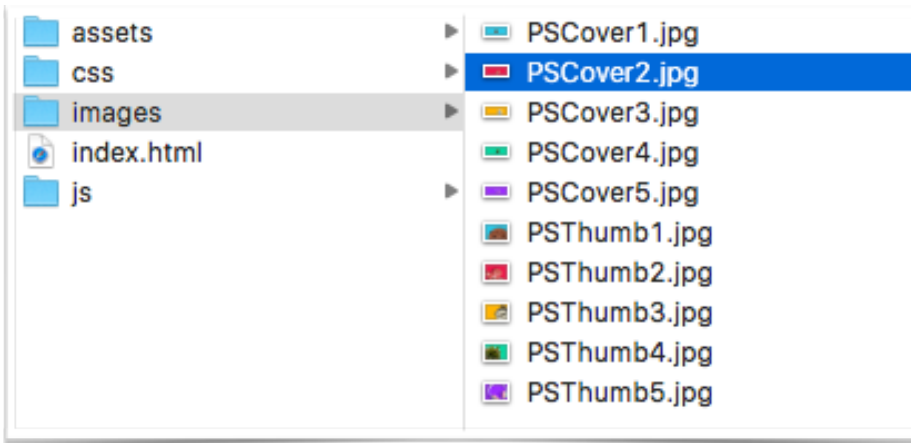

Take all the files you find in the /css and /js folder and paste them in the respective folders of your own file structure.

## Step 7 - Add Cover Images

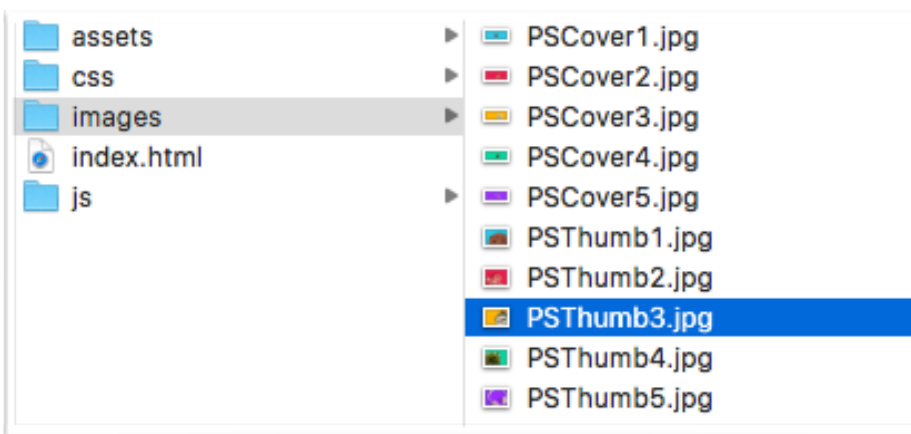

The easiest way to get your own images to appear in the slider, is to rename your images to the same names as the images in the /images folder, i.e. PSCover1, PSCover2, etc. Take all these images and put them in your own images folder. Depending on your file structure, you might have to change the url's in the index.html file so they point to the right folder.

I recommended a cover size of 1020 x 420px so they display nicely and don't become all blurry. And we don't want that, hey?

## Step 8 - Add Thumbnails

Repeat the same process for Thumbnails that you have followed above for Cover images. Rename your thumbnail images to the same names as the images in the /images folder, i.e. PSThumb1, PSThumb2, etc. Take all these images and put them in your own images folder.

I recommended a thumbnail size of 65 x 50px. You can use your preferred photo editing tool to crop your images if you'd like to. Otherwise you can use <http://cropp.me>.

**Step 9 - Done!**

Refresh your page and everything should work correctly. Not working? Shooters!

Something must have gone wrong... 😞

Email me at [steyn@thispattern.com](mailto:steyn@thispattern.com) and I'll gladly help you.

Thanks for trying out Product Slider.
